## Lights and Cameras

### MEDCAM Equine Dental Endoscope Camera

**NEW**

- Produces high resolution images and videos
- Live video capability via camera's screen and image capture feature
- Comes with two interchangeable shafts (Straight and flexible shaft)
- 360° surround viewing angles
- Three Light settings for perfect aperture
- Lightweight one handed operation
- Data easily transferred over via Micro SD card

**& IMPROVED**

**Equine Dental Spec Light ....**

**.... The Best Spec**

**Light Approved by Vets**

- **Aluminium casing for extra durability**
- **Strong magnet fitted to attach to your speculum**
- **Bright LED light 400 Lumens**
- **6500K colour temperature equivalent to Day Light**
- **Rechargeable battery with running time of up to 4 hours**
- **Magnet fitted battery pouch for convenient attachment to your speculum**

*Slimline design*

*Reduced obstruction during examination  
due to a more compact casing design*

**NORTH EQUINE**

## Speculums and Accessories

Our speculums are made up of high quality surgical graded stainless steel. Manufactured through drop forged process, these speculums provide extra durability and functional accuracy whilst in operation. Supplied with biothene straps, which are easy to clean and hard wearing. We offer a 5 year guarantee on all dental speculums.

### MED2010 Millennium Speculum with Biothene Straps

Premium quality drop forged Equine dental speculum has small but deep ratchet settings to ensure a comfortable fit on each individual horse. A durable spring lock, easy to operate mechanism is fitted in these speculums. The release clips provide a smooth motion to ease in the opening and closing of the speculum. Supplied with hardwearing biothene straps that are waterproof and easy to clean. This horse dental gag comes with "spreader bar effect" that keeps the sides of the speculum bent outwards and do not collapse into the horse's cheek during the dental procedures.

### MED2011 SE Speculum with Biothene Straps

A drop forged speculum with six ratchet settings for multiple opening options and the extra depth of these ratchets provides extra security to avoid unexpected closing of the speculum whilst on the horse's mouth. Comes with biothene straps that are flexible and easy to clean and use. Available with normal or extra wide bite plates.

Due to the standard fitting of our speculums these can be used with normal bite plates or extra wide bite plates, therefore you have an option to get any type of bite plates with your speculum. Let us know about your preference and we will supply you the required plates without any additional charge. This speculum comes with "spreader bar effect" that keeps the sides of the speculum bent outwards and do not collapse into the horse's cheek during the dental procedures.

### MED2019 Biothene Straps

Biothene straps are hard wearing, flexible, and easy to use. Stainless steel buckles and accessories are used in making of these straps. Available for all types of speculums.

### MED2012 Pony Speculum with Biothene Straps

This dental speculum is ideal for small horses and ponies. Their smaller size enables technicians to work as normal but with more secure fitting that does not swamp smaller heads.

Supplied with hard wearing biothene straps which are easy to clean and use. This speculum comes with a "spreader bar effect" that keeps the sides of the speculum bent outwards and do not collapse into horse's cheek during the dental procedures.

### MED2013 Extra Wide Bite Plates

These bite plates provide extra room for incisors to rest and reduce the risk of slipping off the plate due to their semi-circle shape. The extra wide arms keep the speculum away from the equine's cheek providing more working space for the technicians to use various angles to access the horse's mouth. Suitable for all types of speculums.

**MED2017 Classic Bite Plates | ED2018 Pony Bite Plates**

These plates are available for both miniature breed (pony) and standard size horses.

**MED2016 Incisor Bite Plates**

Specially designed silicon rubber coated plates are suitable for horses with damaged incisors.

**MED2025NW Dental Elevators Extraction Set**

A very useful piece of kit for extracting and loosening equine wolf teeth, fragments and incisors. Elevator Handles are manufactured from medical grade Teflon and have a grooved ergonomic design. This set contains seven different equine teeth extraction elevators (straight, curved and concave). Various length (Short OR Long) Stainless Steel Elevator shafts are interchangeable using a screw-on tightening mechanism. Supplied in a sturdy zip up wallet.

**MED2025 Elevator Set of 6**

Durable stainless steel kit with seven different elevators to aid extraction of wolf teeth, fragments and incisors. Comes in sturdy zip up wallet.

**MED2026 Elevator Set of 2**

Two piece elevator kit includes a straight and a curved elevator for extraction of wolf teeth, fragments and incisors.

**MED2027 | ED2028 Round & Flat Head Elevators**

These elevators have an ergonomic brass handle and stainless steel blades to provide the perfect angles for removing hard to reach areas of wolf teeth. Ideal for use on off side and near side of the horse's arcade.

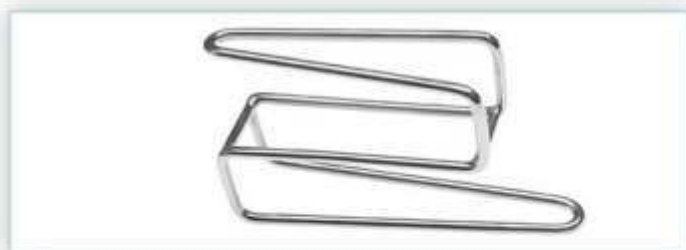

**MED2030 Basic Burgess Set**

Stainless steel wolf tooth elevator kit with ergonomic non slippery handle. Comes with four different replacement 'V' shaped heads which partially surround the tooth to help in elevation or loosening of the tooth. This set also includes 2 extensions (straight and offset) for extending the length of the handle and providing more angles to access required segments of the teeth. The complete burgess set comes with an addition of wolf tooth forceps and a straight ergonomic handle elevator.

**MED2031 Complete Burgess Set**

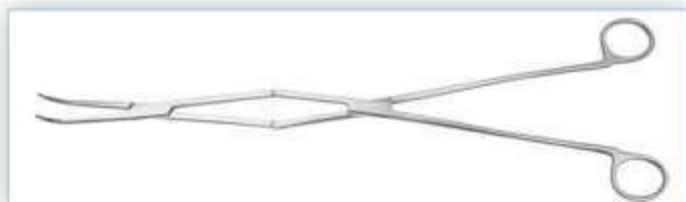

**MED2032 Circular Burgess Heads**

Circular heads can be used with standard burgess kit. These heads are fully rounded and not "V" shaped. Available in 4mm, 6mm, 8mm, 10mm, 12mm and 14mm.

### MED2020 Equine Cheek Retractor

Stainless steel equine retractor can be used to extend the equine cheek away from the molars in order to inspect the arcades before and after work.

### MED2092 Equine Periodontal Forceps

41 cm long stainless steel forceps with an ability to remove forage that accumulates in periodontal pockets and valve diastema between equine cheek teeth.

### MED2067 Drenching Syringe 400ML

Two handed operation to flush/clean out equine mouth.

### MED2068 Drenching Syringe 300ML

300ML syringe- one handed pump operated to clean/flush out equine mouth.

### MED2069 Bucket with Brush 15L

Premium quality stainless steel bucket with brush and a capacity of more than 15 litres. Plastic handle and rubber inner base to keep noise levels to a minimum around nervous horses.

### MED2070 Bucket with Brush 12L

Economy Range Stainless steel bucket with brush, capacity of 12 litres. Rubber inner base to keep noise levels to a minimum around nervous horses.

### MED2021 Mouth Wedge

Comes with ball and two different sized teflon fittings. Inserted between cheek teeth to hold incisors apart. The hard wearing Teflon is also very helpful in preventing tooth fractures.

new

### MED2065MT Mirror with 2 Screw Heads

A mirror hande with two interchange screw heads. 20mm and 30mm heads with 25° angled head

### MED2065SH 40mm Dental Mirror

40mm stainless steel dental mirror with 25° turned head.

### MED2065 50mm Dental Mirror

50mm stainless steel dental mirror with 25° turned head.

### MED2072 Bucket Blade Savers Stainless Steel

High quality stainless steel blade saver with Teflon walls fitted internally. Comes with flexible hook to mount to the buckets.

### MED2071 Bucket Blade Savers Plastic

Manufactured using high quality robust PVC plastic tubes. Comes with flexible hook to mount to the buckets.

**MED2075 19" Three Prong Root Molar Forceps Off Side**

Premium graded stainless steel forceps designed for lower left molars and upper right molars.

**MED2076 19" Three Prong Root Molar Forceps On Side**

Stainless steel forceps designed for lower right molars and upper left molars.

**MED2077 19" Universal Four Root Molar Forceps**

High quality stainless steel four prong molar extractor for removing teeth that are irregular or geriatric or have a short crown. Can also aid in extraction of a fractured tooth.

**MED2079 20" Serrated Jaw Forceps with Screw Fulcrum**

The most popular Serrated Jaw Molar forceps with a screw type removable fulcrum.

**MED2081 20" Long Nose Fragment Forceps**

Long molar root and fragment extractor with long head and grooved jaws to securely grasp roots and fragments that may remain after a molar extraction.

Straight Jaws

Inclined Split Jaws

**MED2082 19" Molar Spreader Forceps**

High quality stainless steel separator/spreader for loosening teeth prior to extraction. Available in two different Jaw Styles.

**MED2098 Dental Fulcrum**

Standard dental fulcrum with two different brass heads. For use with molar extraction equipment.

**MED2087 12" Four Prong Compound Cap Forceps**

Forceps with four prongs are spring operated and very useful for removing caps and other deciduous teeth.

**MED2088 14.5" Small Nose Fragment Forceps**

Specially designed small nose fragment forceps, excellent for removing fragments left over after extraction.

**MED2098 16" Long Nose Fragment Forceps**

Double jointed long nose fragment forceps with grooved jaws, very useful for extracting fragments in hard to reach areas.

**MED2099 Set of 4 Molar Forceps**

Set of four, very useful forceps for separation and extraction of molars and root fragments. Save 10% on normal prices if bought as a set.

### MED2035 9.5" Wolf Tooth Forceps

Stainless steel forceps for the extraction of wolf tooth and incisor caps. Comes with non-slippery knurled handle. The jaws of these forceps are grooved for secure gripping of teeth during the extraction procedures.

### MED2037 Compound Rongeurs

Stainless steel multi-function rongeurs for removing wolf teeth fragments, wolf teeth or cap silvers. Also very helpful for removal of plaque from canine teeth. Spring placement to aid the opening and closing mechanism.

### 6147 6" Root Tip Extraction Forceps

Spring operated 15cm root forceps is cupped like a bone rongeur for convenient extraction of root fragments. Their jaws are fine, serrated beaks and are bent for easy access and gripping of root fragments.

### MED2029 Dental Mallet

For striking chisels and osteotomies. The hollow handle with a lead-tipped head minimises shock and vibration insuring a smooth, even striking force on the chisel or elevators.

### MED2038 7" Offset Wolf/Incisor Teeth Forceps

Premium quality 7" stainless steel forceps for the removing wolf teeth, incisor caps and fragments. Cross hatched grip handles to provide a firm handhold that prevents slippage whilst in use.

### MED2039 7" Curved Wolf/Incisor Teeth Forceps

Multipurpose 7" stainless steel forceps for wolf tooth incisor caps and fragments removal. Very helpful in removing plaque from lower canines. Cross hatched grip handles for non-slippery grip when wet

### MED2040 7" Wolf Incisor Tooth Spreader Forceps

Specially designed 7" stainless steel forceps for spreading incisors prior to extraction. Cross hatched handles for non-slippery grip when wet.

### MED2041 7" Turned Head Forceps

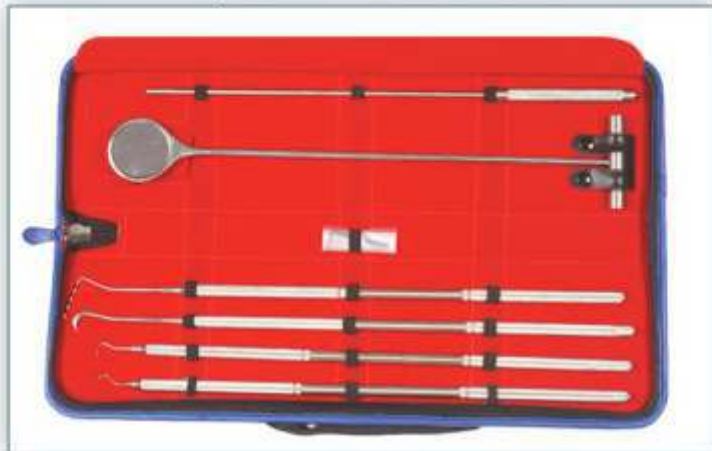

This forceps due to their angled jaws are very helpful in extraction of premolar teeth. Cross hatched grip handles for non-slippery grip when wet.

### MED2042 - Set of 7" Forceps

Set Includes: 7" Curved Wolf/Incisor Tooth Forceps, 7" Offset Wolf/Incisor Tooth Forceps, 7" Wolf Incisor Tooth Spreader Forceps. This set comes in a sturdy zip up wallet.

# Elevators, Picks and Probes

### MED2052 Equine Periodontal Instrument Set

A complete set for equine periodontal work. This set includes a banded periodontal probe, explorer fine point, sickle scaler large hook and small hook, equine needle pick, and equine dental mirror turned head. Supplied in a sturdy zip up wallet.

### MED2053 Multi Pick Set in Zip UP Wallet

Pick set includes four T handles with various angles and one ergonomic round handle. The sets also includes 13 different interchangeable heads. 3 Curette Spoon Heads, 3 Alveolar Loops, 3 Elevators T Head. 4 Round Head Elevators – XS, S, M & L

MED2046 Dental Scaler

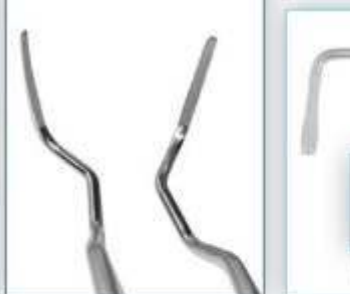

MED2048 Equine Needle Pick

MED2045 Dental Explorer

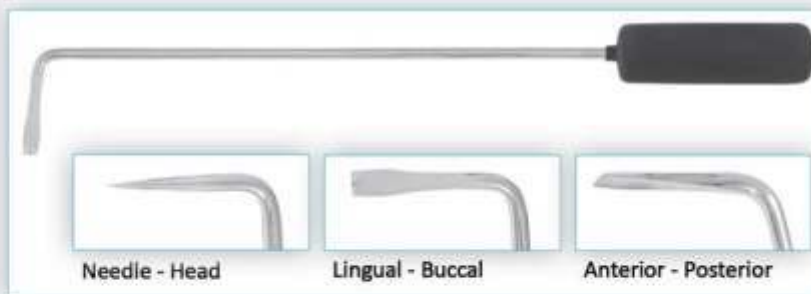

MED2047 Sickle Scaler

MED2051 Banded Probe

MED2049 Gracey Curvette Left and Right

### MED2055 Set of Long Head Dental Picks

Multifunctional Picks are very useful for elevating tissues around molar teeth.

### MED2060 Ramzan's Periodontal Elevator Set

These elevators permit the clinician to break down periodontal attachments of both intact and fractured cheek teeth prior to the use of forceps during the extraction process. The pistol grips allow them to be employed with some force to prise dental tissue free from the alveolar wall and insertion to a considerable depth within the socket facilitates complete extraction of teeth with even long reserve crowns. The choice of straight, angled and curved blades gives the oral surgeon flexibility to deal with teeth throughout the mouth. Comes as a set of five elevators in a water proof wallet.

**MED2124 Diamond Chip Float**

These floats come with a combination of concave and curved ends. They are coated double sided on the curved ends and single sided on the concave end. Diamond gritted file is a fine graded surface float however carbide chipped file is a coarse surface float. Stainless steel file overall length is 12".

**MED2125 Tungsten Carbide Float**

**MED2124XL Diamond Gritted Float Large**

20" Float with Diamond gritted on two concave surfaces, available with inclined or straight heads.

**MED2127 Handy Float**

Coated with fine carbide grit, it has a very sharp cutting profile which creates an excellent finish for standard filing and finishing work.

**MED2126CO Diamond Chip Float Coarse**

Coarse graded diamond coating on a straight surface is suitable for incisors realignment work and filing sharp points.

**MED2126 Diamond Chip S Float Small**

Gritted diamond plate coating on both sides. It has medium and fine rasping profiles for standard filing and finishing work.

## Equine Dentistry Headstands

**MED2074AH**  
**Head Stand Flat Adjustable Cradle**

- Easy to assemble, dismantle and store
- Height Adjustment and Locking System
- Leather padded Head-rest
- Adjustable angle Head-rest from 0° - 30°
- Stainless steel base and frame for extra durability
- Adjustable height from 1- 1.6m
- PVC washable cover included

**MED2074**  
**Head Stand Curved Cradle**

- Risers with spring loaded adjusters
- Secure Bolt Lock Mechanism
- Leather Stitched Curved Head-rest
- Secure steel base
- Adjustable height from 1- 1.6m
- Easily disassembled for compact storage
- PVC washable cover included

## Rectangular Blades with Backing

These blades will fit into standard floats and are mounted on aluminium plates. These blades are versatile and are suitable for all sort of routine dentistry work. Available in fine, medium or coarse grade. Available in three different lengths 50mm, 56mm and 80mm. Also available in Titanium Nitride Coating which are more durable as compared to standard carbide blade.

MED2105	50mm Rectangular Blade with Backing
MED2105TNC	50mm Rectangular Blade with Backing Titanium Nitride Coated
MED2106	56mm Rectangular Blade with Backing
MED2107	80mm Rectangular Blade with Backing
MED2107TNC	80mm Rectangular Blade with Backing Titanium Nitride Coated
MED2108	80mm Rectangular Blade with Backing Re-Grindable

## Oval Blade with Rail

The 2 ¼ (56mm) oval blades with rail are designed to fit into all standard float handles. Mounted on an aluminium body it is designed to be lightweight and easy to use. This blade is ideal for use in M3 as well as Molar Rollers. Its rounded edges greatly reduce the risk of soft tissue damage.

MED2109	56mm Oval Blade with Backing
---------	------------------------------

## Oval Pocket Blades

Available in two sizes 1 ¼" and 2 ¼" oval blades with backings are mounted on aluminium body and can be attached to the floats with the help of screws supplied with these blades. Their rounded ends greatly reduce the risk of soft tissue damage. These medium blades are very aggressive and can remove a large amount of tooth growth. Available in lengths of 32mm and 56mm.

MED2110	32mm Oval Pocket Blade
MED2111	56mm Oval Pocket Blade

## 56mm Oval Stick on Blade

A super strong 3M VHB adhesive is attached with these blades to ensure the secure attachment to the floats. The round edges of these blades are also very helpful to reduce the risk of soft tissue damage.

MED2114	56mm Oval Stick On Blade
---------	--------------------------

## Stick On Blades Rectangular/Oval

Brilliant for removing large amount of teeth and known as slim line blades due to their reduced thickness. A super strong 3M VHB adhesive is attached with the blades to ensure the secure attachment to the floats. The round edges of these blades are also very helpful to reduce the risk of soft tissue damage. Available in 50mm, 56mm and 80mm sizes. 50mm and 80mm are also available in Titanium Nitride Coating which are more durable as compared to standard carbide blade.

MED2112	50mm Rectangular Stick On Blade
MED2112TNC	50mm Rectangular Stick On Blade Titanium Nitride Coated
MED2113	56mm Rectangular Stick On Blade
MED2115	80mm Rectangular Stick On Blade
MED2115TNC	80mm Rectangular Stick On Blade Titanium Nitride Coated

## Carbide Chip Blades

Our carbide chip blades are made from tungsten carbide grit. These blades will fit into all standard floats. Due to their less aggressive nature these blades are designed for finishing work. Available in lengths of 56mm and 80mm.

MED2120	50mm Rectangular Carbide Chip
MED2121	80mm Rectangular Carbide Chip

## Triangular Carbide Inserts

Triangular solid carbide Inserts offer 3 long lasting cutting surfaces. When one is worn out simply rotate around and use the other cutting edge. These inserts are used in conjunction with each other to create a solid cutting surface. Available in 3, 4, 7 or 8 grooves cut.

## Float Handles

### CLASSIC FLAT SHAFT FLOATS

Premium range of floats manufactured from non-magnetic stainless steel. The flat shaft is very useful in establishing the right side of the blade. Suitable for 56mm pocket blade. These floats are classified under 'Low Profile' range due to their reduced thickness.

Code	Description	Blade
MED2130	Straight Shaft Lingual & Buccal Float FS1 44cm	56mm
MED2131	Premolar Float With Inclined Head FS2 44cm	56mm
MED2132	Offset Shaft Float For Lower Arcade FS3 44cm	56mm
MED2133	Straight Shaft Float For Cheek Teeth FS4 58cm	56mm
MED2134	Premolar & Molar Float Inclined Head FS5 58cm	56mm
MED2135	Flat Shaft Float For Upper Back Molars FS6 58cm	32mm
MED2136	Upturned Back Molar Float Turned Head FS7 58cm	56mm

Buy individually OR full kit of seven floats with corresponding blades.

### CLASSIC ROUND SHAFT FLOATS

These floats are made from highly polished drop forged stainless steel. Assembled with comfortable and ergonomic non slippery dotted rubber handle. One side of the shaft is notched to verify the right side of the blade. These floats are well balanced for standard rasping and their lightweight design is such that these are easy to use and reduce pressure on your arm during floating procedures.

Code	Description	Blade
MED2140	Premolar & Molar Float Angled Head SH1 55cm	80mm
MED2141	Premolar Float With Angled Head SH2 44cm	80mm
MED2142	Offset Shaft Float For Lower Arcade SH3 44cm	56mm
MED2143	Straight Shaft Lingual And Buccal Float SH4 44cm	80mm
MED2144	Straight Shaft Float For Cheek Teeth SH5 55cm	80mm

Buy individually OR full kit of six floats with corresponding blades.

### CLASSIC SLIMLINE FLOATS

These floats are made from premium quality stainless steel. Elegantly designed slim line range that accepts 50mm and 80mm stick on blades. These are perfectly suitable for horses with tight working space between their incisors. The overall thickness of the blade and float is slim enough to reach tricky areas of the horse's mouth. A super strong 3M VHB adhesive is bonded between the floats and the blades to ensure secure attachment. Assembled by using ergonomic comfortable non slippery dotted rubber handle.

Code	Description	Blade
MED2147	Premolar Float 25° Angled No21 35cm	50mm
MED2148	Premolar Float 17° Angled No22 41cm	50mm
MED2149	Premolar/Molar Float 10° Angled No23 50cm	80mm
MED2150	Straight Lingual And Buccal Float No24 55cm	80mm
MED2151	Straight Lingual And Buccal Float No26 55cm	50mm

Buy individually OR full kit of five floats with corresponding blades.

## CLASSIC SLIMLINE MINIATURE PONY FLOATS

Ideal for small horses and routine dentistry work. Designed by using an ergonomic rubber dotted handle that helps to maintain the grip when wet and their light weight allow users to keep the balance during rasping procedures. Made from non-magnetic stainless steel.

Code	Description	Blade
MED2153	Premolar Float With 20° Angle SLP1 35cm	50mm
MED2154	Straight Lingual And Buccal Float SLP2 42cm	50mm
MED2155	Lower Arcade Float With 5° Angle SLP3 42cm	50mm
MED2156	Upturned Back Molar Float 15° Angled SLP4 45cm	50mm

Buy individually OR full kit of four floats with corresponding blades.

### MED2128-29 Carbide Gritted Gledhill Floats

Pistol handle grip floats are coated with tungsten carbide chips on a concave surface which creates a perfect rasping angle for finishing the teeth off. Available in upper and lower angles.

## Float Kits

### MED2145B Basic Equine Dental Float Kit

Kit Includes float SH1, SH2, No. 26 and 3 corresponding blades for floats & a water proof roll up wallet.

### MED2145C Complete Equine Dental Float Kit

Kit includes float: SH1, SH2, SH3, SH4 and SH5. 6 corresponding blades to fit in floats and water proof roll up wallet.

### MED2137 Flat Shaft Float Kit

Kit includes Float FS1, FS2, FS3, FS4, FS5, FS6 and FS7. Seven corresponding blades for floats & a water proof roll up wallet.

### Roll Up Wallet for Dental Floats

Easy to clean roll up wallets are very useful to keep your floats and blades organised. Convenient handle for easy carrying.

## MED2167 Pony and Miniature Dental Kit

### Kit includes

- Pony Speculum with Biothane Straps
- Float SLP 1- Premolar float with a 20 degree angled head
- Float SLP 2- Straight Lingual and Buccal float
- Float SLP 4- Upturned 15 degree, back molar float
- 3 x 50mm Stick on Tungsten Carbide Blades
- 1 x Water proof wallet for Floats and Blades

## MED2168 Bronze Package Basic Equine Dental Kit

### Kit includes

- SE Speculum Speculum with Biothane Straps
- Float SH 1- Premolar and Molar float with a 13 degree angled head
- Float SH 2- Premolar float with 15 degree angled head
- Float 26- Upturned 15 degree, back molar float
- 3 x Corresponding Tungsten Carbide Blades
- 1 x Water proof wallet for Floats and Blades

## MED2169 Silver Package Equine Dental Kit

### Kit includes

- SE Speculum Speculum with Biothane Straps
- Float SH 1- Premolar and Molar float with a 13 degree angled head
- Float SH 2- Premolar float with 15 degree angled head
- Float 26- Upturned 15 degree, back molar float
- 3 x Corresponding Tungsten Carbide Blades
- 1 x Water proof wallet for Floats and Blades
- 1 x 400ml Dental Syringe
- 1 x Small "S" File Diamond Coated
- 1 x 50mm Dental Mirror

## MED2170 Gold Package Advanced Equine Dental kit

### Kit includes

- SE Speculum Speculum with Biothane Straps
- Float SH 1- Premolar and Molar float with a 13 degree angled head
- Float SH 2- Premolar float with 15 degree angled head
- Float 26- Upturned 15 degree, back molar float
- 3 x Corresponding Tungsten Carbide Blades
- Premium Stainless Steel bucket with brush
- 1 x Water proof wallet for Floats and Blades
- 1 x 400ml Dental Syringe
- 1 x Small "S" File Diamond Coated
- 1 x 50mm Dental Mirror
- Head light with elastic head band OR magnetic spec light (optional)

**MEQ2240 Reimer's Emasculator 13"**

A very popular emasculator has a double crushing part. The cutting lever is operated separately. This allows extra time for crushing action and diminishes after bleeding. Back lock keeps on crushing without hand power unless unlocked while cutting can be done with a separate part attached to it. Cutting and other functions are tested before supply.

**MEQ2238 Serra's Emasculator 14"**

This tool has three actions: clamping, crushing and cutting. It draws the cord concentrically into the jaws, thus preventing slipping of the cord, as the jaws are closed on the spermatic cord it is gripped by the clamping part. Ratchets holds emasculator locked. Cutting and other functions are tested before supply.

**MEQ2241<sup>SML</sup> Equine Stomach Pump 17"**  
**MEQ2241 Equine Stomach Pump 21"**

The Equine Stomach Pump, an excellently designed stainless steel stomach pump, available with or without tubing.

**MEQ2237 Sand's Castration Clamp 13"**

The Sands Emasculator operates by crushing the spermatic cord, it continues crushing whilst the back lock is locked. This castration tool is specifically designed for blood less castration as blood vessels are crushed, this cuts off the blood supply.

**5164 Large Animal Cervix Forceps 21"**

Smooth operation pistol handle with step locking ratchet mechanism and easy to release one click hook for ease of operation. Length 21" 53cm.

**Sinus Horsley Trepine**

- 5171 Horsley's Trepine 13mm/0.5" OD 12.5cm(5") Long
- 5172 Horsley's Trepine 19mm/0.75" OD 12.5cm(5") Long
- 5173 Horsley's Trepine 25mm/1.0" OD 12.5cm(5") Long
- 5174 Horsley's Trepine 45mm/2.0" OD 12.5cm(5") Long

**5163 Uterine Biopsy Punch 25"**

Lightweight Stainless Steel Biopsy Punch with a scissor grip and smooth, free running mechanism. Length 25" 64cm.

**Kidney Dishes**

- MKDY6 Kidney Dish Small 6"
- MKDY8 Kidney Dish Medium 8"
- MKDY10 Kidney Dish 10"
- MKDY12 Kidney Dish Large 12"

**Stainless Steel Instrument Storage Boxes with Lid**

- MTY201040 Box with Lid 200mm x 100mm x 40mm
- MTY221250 Box with Lid 250mm x 130mm x 50mm
- MTY301550 Box with Lid 300mm x 150mm x 50mm
- MTY402070 Box with Lid 400mm x 200mm x 70mm

## Farrier Tools

Premium range of farrier tools specially designed for farrier and veterinary professionals. Some of these tools are a must for every tack room or horse box to perform standard farrier procedures.

**MFT2210 Hoof Nail Puller**  
Length 30cm, Stainless Steel Polished

**MFT2207BLK Shoe Puller/Spreader Black Coated**  
Length 30cm, Black Steel Coated

**MFT2211 Hoof Nipper/Trimmer**  
Length 32cm, Stainless Steel Polished

**MFT2219 Hoof Nipper/Trimmer**  
Length 30cm, Black Steel Coated

**MFT2238 Hoof Clincher**  
Length 32cm, Stainless Steel

**MFT2220SL Hoof Nipper Spring Loaded**

These are ideal for one handed use. The internal spring is hidden away inside, Jaws include a Locking Nut for when not in use

**MFT2240 Hoof Nipper/Trimmer Half Round Jaws**  
Length 30cm, Stainless Steel Polished

**MFT2207 Shoe Puller/Spreader**  
Length 30cm, Stainless Steel Polished

**MFT2211 Hoof Nipper/Trimmer**  
MFT2220B Hoof Nipper/ Trimmer 12" Stainless Steel  
MFT2220C Hoof Nipper/ Trimmer 14" Stainless Steel  
MFT2220 Hoof Nipper/ Trimmer 15" Stainless Steel

**MFT2243 Multi Farrier Pull Off**

Perform all major functions that a shoe puller, hammer and buffer would perform in shoe removal.

### Farrier Hammers

- MFT2213 Farrier Hammer Round Head  
MFT2213OCT Farrier Hammer Octagonal Head  
MFT2213SH Farrier Hammer Square Head

### Clinch Cutters/ Hoof Buffer

- MFT2235 Heavy Duty Clinch Cutter  
MFT2235T Thin Design Clinch Cutter

**MFT2201 Large Hoof Tester 38cm**

Stainless Steel Polished, Max jaw Opening 17cm, Pointy Jaws

**MFT2202 Heavy Duty Hoof Tester 35cm**

Stainless Steel Polished, Max jaw Opening 17cm, Grooved Jaws

**MFT2204 Adjustable Hoof Tester 40cm**

Length 40cm, Adjustable sliding Jaws for various Hoof sizes

**MFT2203 Flat Pattern Hoof Tester 32cm**

Length 32cm, Stainless Steel Polished, Square Grooved Jaws

**MFT2216**

Hoof Kit (Polished Stainless Steel)

**MFT2216BLK**

Hoof Kit (Black Coated Stainless Steel)

**ALSO AVAILABLE!!  
With a Roll  
Up Wallet Case**

Our superior quality farrier kits are supplied in rexine zip up wallet. The tools included in the package are fine quality and are thoroughly checked before dispatch. The products included in the package are hoof rasp with wooden handle, farrier hammer, standard hoof knife, clinch cutter, hoof nipper, shoe puller and zip up wallet with storage pockets. Alternative option of stainless steel shoe puller and hoof nipper is also available with different price.

**MFT2244 Roll Up Farrier Hoof Kit**

A range of essential Farrier instruments Provided in a roll up wallet for easy storage. Hoof Pick, Clinch Cutter, Scraper, Trimmer, Farrier Hammer, Clincher, Hoof Knife and Rasp.

**MFT2239 Hoof Knives Roll Up Pouch**

Set of interchangeable hoof knife blades in a roll up pouch, includes a Searcher Knife.

**MFT2236 Hoof Knives Zip Up Wallet**

Set of interchangeable hoof knife blades in a zip up wallet.

## Farrier Hoof Knives and Accessories

Our hoof knives are manufactured using high quality hard wood and premium graded stainless steel. The blades of these knives are well sharpened and ready to use when supplied. These knives come in various handles and styles to suite various hoof trimming requirements.

MFT2221 Hoof Knife Standard - Right Handed  
MFT2222 Hoof Knife Standard - Left Handed

MFT2225 Hoof Knife Narrow Blade - Right Handed  
MEF2226 Hoof Knife Narrow Blade - Left Handed

MFT2228 Hoof Knife Double Sided Standard

MFT2237 Vet Searcher Hoof Knife Brass Collar

MFT2227 Hoof Knife Swiss Pattern

MFT2231BH Offset Shaft Hoof Knife Banana Handle
